**FIELD MONITORING IN GEOMECHANICS**  
**IMPERIAL COLLEGE LONDON**  
**2022**

“Field measurement data are only numbers unless they are properly interpreted. Therefore, the most important aspect of field measurements is the quantitative interpretation of measurement results.”

Professor Shunsuke Sakurai

The 11th International Symposium on Field Monitoring in Geomechanics will be held at Imperial College London from **4th to 8th September 2022**. The event will bring together people from across the geotechnical monitoring sector to promote better understanding, interpretation and presentation of field measurements.

#### WHY ATTEND?

- See the latest monitoring technologies
- Hear from international experts
- Learn how to interpret monitoring data
- Witness the 1st Dunicliff Honour Lecture

#### PROGRAMME

Field instrumentation is uniquely able to answer the questions that geotechnical engineers ask. The programme will include Special Lectures, Technical Presentations, Young Engineers Paper Competition, Poster Sessions, Exhibitions, Workshops and Technical Tours, as well as a parallel non-technical programme.
